Course Strengths:
Course appears to be developed for different learning styles
Instructor and TA are accessible

Course Weaknesses:
An immature student may have a problem with the teaching style that relies on students being accountable.
It is a course that would be easy to fall behind in.

Improvements to be Made:
Visuals on how to navigate the course website. Because I am still discovering features that would have been useful from the beginning of course.

Organization: Agree
How to navigating from discussion board to modules could be made clearer in Module 0.

Response ID 816351 | Submitted Dec. 2, 2020, 2:50 p.m. (view full response)

Course Strengths:
The discussion tasks were excellent at starting deeper conversations. The small class size also contributed greatly and it was nice to recognize familiar names by the end of this weird semester.

Course Weaknesses:
In a normal semester, the weekly discussion and assignment would have worked out well. However, given that almost all classes followed a similar model, it was challenging to balance everything.

Improvements to be Made:
Overall, I would suggest mixing up the timeline more so than was done this semester, as some parts of modules followed similar themes. Perhaps only the top six of the eight papers should count in pandemic semesters, as the workload in addition to similar courses was challenging.
